Microneedling **NXT**[®]
Skin Rejuvenation
By Refine USA

What is Microneedling? What can it do for my skin?

As we age, our bodies stop being able to repair and maintain themselves.

In the skin, this can be seen from the surface (fine lines, wrinkles, poor texture) as the internal structure (collagen & elastin) degrades.

Microneedling Skin Rejuvenation or Collagen Induction Therapy is a well practiced and minimally invasive way to kick-start your body's natural healing ability, resulting in healthier, younger-looking skin!

Fine sterile needles or 'microneedles' repeatedly pierce the stratum corneum producing microscopic "channels" in the dermis. These small wounds lead to the release of growth factors stimulating the formation of new collagen, elastin, and neovascularization in the dermis.

"Rejuvapen is an amazing technology!"

My experience after 6 treatments has been life changing. The Rejuvapen has improved my appearance, my relationships, and the way I compose myself in public.

- Shawndra S., Rejuvapen Patient

7 Benefits of Microneedling with Rejuvapen NXT®

- Quick, comfortable treatment with minimal downtime
- Customizable to your individual skin care needs
- Safe and effective for all skin types
- Ideal treatment for any time of year
- Great for maintaining youthful skin
- Effective for repairing sun damaged skin
- Beautifully refined, natural-looking skin with long-lasting results
