

Your results

YOUR RESULTS

Dear

Please find enclosed the results to your Future health test.

Using DNA extracted from your sample, we created what is known as polymerase chain reactions (PCR) or PCRs, which are copies of small segments of your DNA, to carry out molecular and genetic analyses.

The tests were carried out in triplicates and the results have enabled us to determine your risk for developing a specific range of conditions, listed overleaf.

We hope that you find your results easy to understand. If you need any further help, please contact one of our expert advisers who will be happy to review your genetic test results with you.

If you are presenting any symptoms, feel unwell or concerned about your Future health test results and want advice on what to do next, please visit your personal healthcare provider or GP.

Yours sincerely,

Dr Ioannis Papasotiriou

Founder and CEO Biocentaur

UNDERSTANDING YOUR TEST RESULTS

The results of your tests are presented in an easy-to-understand format with 'normal' risk shown to the left and increased risk shown to the right. If you are showing an increased risk, we will tell by how many times you are more likely to develop a certain disease.

	NORMAL RISK	INCREASED RISK	HIGH RISK
CONDITION #1		•••••••	
CONDITION #2	••••••		••••
CONDITION #2			

If you need any help interpreting your results, please contact one of our expert advisers in one of the following ways:
